BIGFOOT ABRASIVE COMPOUND

BigFoot abrasive compounds are the result of in-depth studies and research and consist of high quality abrasive mixes, all silicone free. **The compounds are specifically designed for random orbital polishing.** Random orbital polishing compounds require a unique formula to assure that the product has the perfect combination of viscosity and aggressiveness. **These unique compositions result in a product whose consistency delivers the best possible solution for uniform distribution on the foam polishing pad.** Four different types of compounds are available, each satisfying a particular polishing need.

COARSE

ZEPHIR GLOSS: is a high-performance compound recommended for first step polishing. Its grain is the most "aggressive" of the BigFoot abrasives and is used for the rapid removal of marks and scratches. At the same time Zephir is highly effective in restoring paints and creating a high degree of gloss.

RECOMMENDED

- Simplifies the removal of marks produced by grains down to P1500. For best results is suggested to use Gel compound with RUPES **COARSE** and **MEDIUM** polishing foam for random orbital polisher

MEDIUM

QUARZ GLOSS: is a medium grain abrasive compound that easily repairs minor surface scratches and minor scoring from sources such as car wash brushes. Quarz can be used with full confidence that it will not leave halos or holograms.

RECOMMENDED

- Simplifies the removal of marks produced by grains down to P2500. For best results is suggested to use Gel compound with RUPES **COARSE** and **MEDIUM** polishing foam for random orbital polisher.

FINE

KERAMIK GLOSS: is the ideal composition for perfect finishes on particularly hard clear coats. This fine water-soluble abrasive compound is ideal for totally eliminating paint defects and for a hologram-free final step of spot repair, following the microabrasive nib removal process.

RECOMMENDED

- Also suitable for clear and particularly hard surfaces. For best results is suggested to use Gel compound with RUPES **FINE** and **ULTRA FINE** polishing foam for random orbital polisher.

ULTRAFINE

DIAMOND: Diamond is specifically formulated for the final finishing pass and its ultra-fine abrasive generates a deep lustre and color depth. The product is water soluble, allowing for easy removal of any residue.

RECOMMENDED

- Enhances the polish of surfaces and colour depth. For best results is suggested to use Gel compound with RUPES **FINE** and **ULTRA FINE** polishing foam for random orbital polisher. The extreme lustre and gloss that all professionals have sought for years are finally easily within reach!

ABRASIVE COMPOUNDS FOR RANDOM ORBITAL POLISHER

250 ml

Code	Description	Size	Unit
● 9.BFZEPHIR250/6	COARSE	250 ml	1 carton with 6 compounds
● 9.BFQUARZ250/6	MEDIUM	250 ml	1 carton with 6 compounds
● 9.BFKERAMIK250/6	FINE	250 ml	1 carton with 6 compounds
● 9.BFDIAMOND250/6	ULTRAFINE	250 ml	1 carton with 6 compounds

500 ml

Code	Description	Size	Unit
● 9.BFZEPHIR500/8	COARSE	500 ml	1 carton with 8 compounds
● 9.BFQUARZ500/8	MEDIUM	500 ml	1 carton with 8 compounds
● 9.BFKERAMIK500/8	FINE	500 ml	1 carton with 8 compounds
● 9.BFDIAMOND500/8	ULTRAFINE	500 ml	1 carton with 8 compounds

1000 ml

Code	Description	Size	Unit
● 9.BFZEPHIR/8	COARSE	1000 ml	1 carton with 8 compounds
● 9.BFQUARZ/8	MEDIUM	1000 ml	1 carton with 8 compounds
● 9.BFKERAMIK/8	FINE	1000 ml	1 carton with 8 compounds
● 9.BFDIAMOND/8	ULTRAFINE	1000 ml	1 carton with 8 compounds

If excessive pressure is used, the pads will not work properly and could deteriorate quickly. It is sufficient to rest and accompany the machine during the polishing work.
