### 4.0 TECHNOLOGY

The new 4.0 technology, with interconnected and interactive intelligent sensors and devices that can be managed remotely, have enabled the development and design of new touch screen control panels for managing the extraction unit. Through this latest generation device, the turbines are constantly monitored and controlled remotely, worldwide, directly by our specialised engineers who can see the operating status of the machine in real time, optimise extraction performance according to the customer's requirements and plan scheduled remote maintenance to prevent faults and to solve them remotely if they occur.

**HE 201S - HE 501S - HE 901S**  
Single pump turbines

HE201S	HE501S	HE901S
7.950€	9.540€	12.720€

**HE 501iS - HE 901iS - HE 1301iS**  
Turbines with inverter system

HE501iS	HE901iS	HE1301iS
12.720€	15.900€	18.020€

**HE 1801iS - HE 1901iS - HE 2001iS**  
Turbines with inverter system

HE1801iS	HE1901iS	HE2001iS
27.030€	29.680€	34.980€

**HE 2301i - HE 3001i - HE 4001i**  
Turbines with inverter system

HE2301i	HE3001i	HE4001i
33.345€	42.873€	53.591€
