

PrecisionPro backing pads

RUPES introduces the evolution of the PRECISIONPRO backing pads for random orbital polishers, a project developed to optimize materials and deliver an enhanced polishing experience.

Among the most significant updates is the new polyurethane interface, which is directly heat-welded to the hook-and-loop attachment. This technical solution significantly improves the solidity, stability, and durability of the backing pad. The hook-and-loop material itself has also been upgraded to provide superior grip and greater long-term reliability.

Furthermore, the new design improves the handling of the polisher, reducing operator fatigue during prolonged use. Its geometry and balance have been meticulously engineered to guarantee even greater stability, ultimately enhancing the precision and quality of the final result.

Backing pads PrecisionPro D-A Ø150mm - Ø6"

For iBrid HLR21 and LHR21 MarkV

Backing pads PrecisionPro D-A Ø125mm - Ø5"

For iBrid HLR15, LHR15 MarkV and LHR125E

With this update, RUPES reaffirms its commitment to developing increasingly advanced and high-performing solutions designed to meet the rigorous demands of professionals and end-users.

The new backing pads are already available globally through our authorized distributors.

CODE	980.720	981.720
Price	26,00 €	28,00 €
Description	Ø125mm - 5"	Ø150mm - 6"
Interface	Velcro	Velcro
Holes	-	-
Hardness	Hard	Hard
Tool	iBrid HLR15 - LHR15 MarkV - LHR125E	iBrid HLR21 - LHR21 MarkV
Fitting	M8	M8
Units	1	1
EAN Code	8050246743690	8050246743706
