NEW MICROFIBER POLISHING PADS

D-A COARSE

The **D-A COARSE Microfiber Pad** is designed to rapidly remove severe defects, sanding marks, and scratches on medium to hard paint systems. The specialized microfiber material, combined with the new foam inter-layer, delivers fast and efficient cutting performance providing a more comfortable and controlled polishing action.

The **new inter-layer** also offers improved heat resistance, helping to reduce thermal stress and providing enhanced pad durability. Pair with **RUPES D-A COARSE** compound and experience fast, efficient defect removal.

D-A FINE

The **D-A FINE microfiber polishing pads** are specially designed for the removal of moderate defects, swirls, haze, and holograms on medium to hard paint systems. The specialized microfiber material provides an ideal balance of cutting and finishing performance.

The new **inter-layer** provides improved heat resistance, enhancing the overall durability of the pad. Used with **RUPES D-A FINE** compound, it delivers quick removal of moderate defects together with a high degree of finish quality. Use with **RUPES UNO PROTECT** to remove moderate defects, refine the surface, and deposit durable polymer protection.

Combined with **UNO ADVANCED** compound, it delivers quicker removal of fine defects while maintaining an exceptionally high level of finish quality and durable protection.
